## Reviews of the One Hundred Hungry Ants (Turtleback School & Library Binding Edition) by Elinor Pinczes, Bonnie Mac Kain

Nenayally

This was a cute book and a great addition to our homeschooling unit about ants for a laugh. I probably read it aloud a good handful of times and it would make a great group read.

My students LOVED this book (Pre-K/Kindergarten). We made predictions throughout and used

small ants (package of 144) to manipulate for each scenario after reading through the book one other time. This was a great addition to our Picnic unit that incorporated math - I love when books allow or cross-curricular teaching!

We are learning different ways to skip count and find patterns in ways to get to 100. I read this to the students in class. They loved the book, the processing, and pictures. They were able to process and discuss the different patterns of the lines the 100 ants formed. Then they were able to relate this to coins in a dollar. The book is ideal for guided reading and discussion. It has rhythm, which is important for young children to recall concepts. It also it is a lot of fun. They enjoyed me reading to them, and then they wanted to hold the book and read it again to themselves. I highly recommend this book, for learning and just for fun reading.

Grandkids LOVED IT!

The book is really, really cool. I liked it a lot. The best part was the end when they were chasing the little ant.

My son absolutely loves this book. We secularly homeschool and I use it to help with counting. I actually printed out 100 ants on paper, cut them out with a 1 inch hole punch and we set up a picnic with felt food. I then read through the story and pause as we line up the ants in the various ways the book says. He loves it and requests to do it almost every day.

Perfect for the hundredth day of school.

My students enjoyed this book!
