Using the *Anatomy Academy* books, students can unravel the beauty and complexity of the body. As students work through these activities, they will not only gain a considerable amount of knowledge about how their bodies work, but will develop an appreciation for the wonders of their bodies. In the end, students will be able to view their bodies as the most intricate, well-designed, and incredible machines that have ever been produced. Discover the wonders of the human body with these three books. Learn about cells, muscles, and bones with activities like Mitosis Mix-Up, Skeleton Mania, and Making a Move. Each book presents concise information about the body, followed by activities that allow students to test comprehension and apply information. The books also include: worksheets, activities, research topics, experiments, special projects, and tests. These are complete, reproducible units that will enable students to understand and appreciate the human body. Book 1 covers the topics of cells, muscles, and bones. Other books in the *Anatomy Academy* series are *Anatomy Academy Book 2: Respiration, Circulation and Digestion Systems* and *Anatomy Academy Book 3: Nervous System, Senses and Glands*. Grades 5-6
