Such a wonderful book! Clear and fun to read and important insights on how to lead and influence your family so that when your children fly the nest they can be the wonderful adults you dream of.

Kudos to Betty Lou Bettner and Amy Lew!

This book is great for therapists working with families and for parents who desire to bring their family closer together. The book is simple to follow and gives great examples to clarify understanding of the concepts. Focus is on Crucial C's as the foundation for raising children and how to implement those in family meetings.

I've been going back to this book and recommending it to others for years. It is the most useful book I've ever come across for showing parents how they can use family meetings to create a more respectful, appreciative, and cooperative environment between parents and children, and between the children themselves. Everyone wishes their family problems would end, but few of us parents know what to do differently. If you are tired of nagging, fussing, complaining, and not getting any help or cooperation--then you will want to read this book and learn how to get your kids and your family on a better path.
