

Microbiology and Epidemiology of Infection For Health Science Students *by* P.D. Meers, Judith Sedgwick, Margaret Worsley

ISBN: 0412599007

ISBN13: 978-0412599002

Author: P.D. Meers, Judith Sedgwick, Margaret Worsley

Book title: Microbiology and Epidemiology of Infection For Health Science Students

Pages: 1

Publisher: Nelson Thornes Ltd; New edition edition (January 19, 1995)

Language: English

Category: Biological Sciences

Size PDF version: 1443 kb

Size ePUB version: 1206 kb

Size FB2 version: 1502 kb

Other formats: mbr rtf lrf txt

This book provides background information about the various types of microbes, how they affect people, and how to prevent the spread of the infections they cause. Microbiology is defined broadly to include parasitology with descriptions of the principal diseases caused by protozoa, worms and insects. Both clinical and community aspects of infection management are considered in this practical book. This book should be of interest to students in nursing and other health sciences, especially dietitians, nutritionists and hygienists.
