When the vegetarian vampire falls asleep on a plane and wakes up in Australia he is very fed up. After all it is christmas and that is when vampires want to be with their families. However after a while Vlad falls in love with Australia and realises it is a good place to launch his project to help endangered species. For a start Vlad can talk which is more than pandas and parrots and whales can do and vampires are dying out too. Vlad is a very green part of the Green Movement. More fun and chaos from the pint-sized vegetarian vampire.
